

## **In Stream Blasting**

Indiana Fish and Wildlife Code requires that a permit be procured from the Indiana Department of Natural Resources before setting, using or discharging dynamite or other explosive in any waters of the State. IDNR may issue a blasting permit upon receipt of written notification.

Notification must include:

- Company name (with phone number),
- Location where blasting will take place,
- When blasting will occur, and
- Purpose served by blasting (such as to remove a pier)

**Always identify intended blasting in project plans submitted for other permits.**
